EXHIBITS

- A. Increase in CCPI through December 2007
- B. Allowance Purchasing Power as of December 2007
- C. Number of Benefit Recipients by Purchasing Power Level
- D. Estimated Cost of Restoring Purchasing Power During 2008-2009
- E. Restoration of Purchasing Power through Supplemental Benefit Payments
- F. Fiscal Year 2006-2007 SBMA Recipients Classified by Monthly Allowance Payable
- G. Fiscal Year 2006-2007 SBMA Recipients Classified by Age Range

**CALIFORNIA
STATE TEACHERS' RETIREMENT SYSTEM**

**2008 REPORT TO THE GOVERNOR AND LEGISLATURE
REQUIRED BY SECTION 24400 OF THE EDUCATION CODE**

I. LEGISLATIVE REQUIREMENT

Chapter 802, Statutes of 1979 (AB 604) added Section 24700 of the Education Code (renumbered in 1993 as Section 24400), which currently reads:

"The Legislature recognizes that inflation erodes the purchasing power of benefits paid under the plan under this part. It is the intent of the Legislature to understand the degree of erosion of these benefits. The board shall report to the Governor and Legislature no later than June 1 of each year on the extent to which inflation has eroded the purchasing power of benefits provided under the Defined Benefit Program. The board shall indicate the amount of supplementary increases in retirement allowances required to preserve the purchasing power of benefits provided by the Defined Benefit Program. The board shall also determine and report on the increases."

As a result, the Teachers' Retirement Board has prepared a report on:

- The current purchasing power of the Defined Benefit (DB) Program allowances payable by the California State Teachers' Retirement System (CalSTRS).
- The allowance increases granted to date.
- The amount of supplementary increases needed to restore current allowances to a minimum of 80 percent of the purchasing power of the initial allowances.
- The amount of supplementary increases needed to restore current allowances to 90 and 100 percent of the purchasing power of the initial allowances.

II. BASE YEAR AND REPORTING PERIOD

The current DB Program retirement formula was implemented in 1956 and all existing allowances were increased to reflect the improved formula. As of December 2007, only 24 benefit recipients have benefit effective dates prior to 1956. Therefore, 1956 was selected as the beginning year for this report, and all allowances with benefit effective dates prior to 1956 have been combined in a single group.

CalSTRS has maintained benefit statistics and applied ad hoc allowance increases on a July 1 through June 30 fiscal year basis to coincide with the school year. For this report, however, the calendar year is normally selected because the California Consumer Price Index for the preceding December is the most current data available for preparation of this report.

III. HISTORY OF ALLOWANCE INCREASES

Under the DB Program, allowances are increased by an annual benefit improvement factor equal to 2 percent of the initial allowance payable. Additional increases have been paid to recipients on an ad-hoc basis. The term "ad hoc increase" refers to a permanent increase in the allowance that is calculated once and paid as long as the allowance is payable. The design of ad hoc allowance increases has varied. Specified percentage increases in the first \$300 of allowance were applied as of July 1 of 1967, 1972, 1976 and 1978.

The minimum unmodified allowance was increased as of July 1, 1972, October 1, 1980, and September 1, 1981. This "minimum guarantee" is the lowest amount of monthly allowance payable for each year of service credit earned by the member. In 1972, the minimum guarantee was increased from \$80 per year to \$10 per month for each year of creditable service. In 1980, the minimum guarantee was increased to \$16 per month for each year of service credit; and, in 1981, to \$18 per month for each year of service credit.

Effective January 1, 2000 certain benefit recipients received allowance increases to bring total annual DB Program benefit payments to specified minimum levels, pursuant to Chapter 632, Statutes of 1999 (SB 713). These minimum benefit levels were based on the member's credited service under the DB Program at the time of the member's retirement, disability or death. These increases were based on a graded scale beginning at \$15,000 with 20 years of service credit, increasing \$500 for each additional year of credited service, in one-year increments, to \$20,000 with 30 or more years of service credit. These increases receive the annual 2 percent benefit improvement beginning September 1, 2001, and are measured for purchasing power based on the January 1, 2000 effective date.

Effective January 1, 2001, an additional group of benefit recipients received allowance increases to bring total annual DB Program benefit payments to the specified minimum levels, pursuant to Chapter 1026, Statutes of 2000 (SB 1505). These minimum benefit levels are based on the member's credited service under the DB Program at the time of the member's retirement, disability or death. These increases are based on the same graded scale as those effective January 1, 2000 beginning at \$15,000 with 20 years of service credit, increasing \$500 for each additional year of credited service, in one-year increments, to \$20,000 with 30 or more years of service credit. These increases receive the annual 2 percent benefit improvement beginning September 1, 2002, and are measured for purchasing power based on the January 1, 2001 effective date.

Chapter 1027, Statutes of 2000 (AB 429) provided an additional ad hoc increase for all DB Program benefit recipients who had begun receiving a benefit prior to January 1, 1998. The ad hoc increase ranged from 1 percent for those who began receiving a benefit in 1997 to 6 percent for those who began receiving a benefit prior to 1975. The ad hoc increase is not applied to the minimum allowance increases provided in either 2000 or 2001. These increases receive the annual 2 percent benefit improvement beginning September 1, 2002, and are measured for purchasing power based on the January 1, 2001 effective date.

The first allowance purchasing power increase was applied as of January 1, 1980. The DB Program allowance "purchasing power" is measured by changes in the California Consumer Price Index (CCPI), and reflects changes in the cost-of-living since a benefit became effective. The purchasing power maintenance concept attempts to maintain the allowance at a specified percentage of the purchasing power of the initial allowance.

In addition to ad hoc allowance increases, which permanently increase the allowance, annual supplemental benefit payments (payable in quarterly installments) have been implemented. The supplemental benefit payments for any one-year are dependent upon the money available for that year. Beginning July 1, 1983, an appropriation from the General Fund equal to 5 percent of the average increase in the statewide payroll for certificated school employees over the previous three years was included in the Governor's Budget for the Retirees' Purchasing Power Protection Account. The proceeds of the account were distributed in supplemental payments to bring those allowances with the lowest purchasing power to a common minimum purchasing power level.

Since July 1, 1984, revenue derived from the use of School Lands has been provided to CalSTRS each year for quarterly supplemental benefit payments. The income derived from School Lands must be prorated among all benefit recipients whose allowances, after application of the annual 2 percent benefit improvement, are below a certain percent of the purchasing power of their initial allowances. From July 1, 1984 through December 31, 2001 the School Lands income was prorated between those whose allowances were below 75 percent. Since January 1, 2002, the School Lands income has been prorated between those whose allowances were below 80 percent.

Beginning July 1, 1990 and each July 1 thereafter, an amount equal to a specified percentage of total member salaries has been transferred from the General Fund to the Supplemental Benefit Maintenance Account (SBMA) in the Teachers' Retirement Fund. This replaced the appropriation that had been made to the Retirees' Purchasing Power Protection Account. The proceeds of the SBMA are distributed annually in quarterly supplemental benefit payments to restore the purchasing power of all allowances to a specified minimum of the purchasing power of the initial allowance. The amount of payment is equal to the amount needed to restore the current allowance to the minimum level of purchasing power, after any supplemental payment was made from School Lands funds. Like other supplemental payments, these payments were not vested and would only be made to the extent funds were available in the account.

Until April 1, 1998 the supplemental benefit payments restored allowances to 68.2 percent of the purchasing power of the initial allowance. Chapter 939, Statutes of 1997 (SB 1026), effective January 1, 1998, increased the supplemental benefit to a minimum of 75 percent of the purchasing power of the initial allowance. Partial funding for this increase was provided as a result of the federal sale of the Elk Hills Naval Petroleum Reserve and the federal payment of 9 percent of the proceeds of that sale to CalSTRS. This federal payment represents the school lands portion of this sale, which was to be received by CalSTRS over a period of seven years beginning in fiscal year 1998-99. Subsequently, two expected payments of \$72 million each were reduced by Congress to \$36 million each. In federal fiscal year 2006, \$48 million was appropriated, leaving a balance to be paid to CalSTRS of about \$18 million, depending on the final determination of the direct expense of selling the reserve, of which CalSTRS will bear a nine percent share. Chapter 939 also authorizes the CalSTRS Board to transfer funds from the Teachers' Retirement Fund, increase employer contributions, or reduce the distribution below 75 percent, if the resources in the SBMA are insufficient to maintain the 75 percent purchasing power payments.

Chapter 840, Statutes of 2001 (AB 135), effective with the 2001-02 fiscal year, increased the supplemental benefit to a minimum of 80 percent of the purchasing power of the initial allowance.

Chapter 1006, Statutes of 1998 (AB 1102) continuously appropriates an annual transfer from the General Fund to the SBMA, equal to 2.5 percent of the total creditable compensation of the immediately preceding calendar year, effective July 1, 1999. This provision established the supplemental payments as a vested benefit (to the extent sufficient funds are available in the SBMA) pursuant to a contractual obligation to make the annual transfer from the General Fund to the SBMA.

Chapter 1021, Statutes of 2000 (AB 2700), revised the annual transfer from the General Fund from 2.5 percent of the total creditable compensation of the immediately preceding calendar year to 2.5 percent of the total creditable compensation of the fiscal year ending in the immediately preceding calendar year, effective July 1, 2003.

Chapter 6, Statutes of 2003 (SBX1-20) decreased the transfer from the General Fund, due on July 1, 2003, by \$500 million. CalSTRS considered this act to be illegal and is engaged in legal action to restore the \$500 million funding to the SBMA.

The Teachers' Retirement Board successfully pursued litigation to compel payment of the \$500 million (principal). Part of the principal plus interest, totaling \$500 million was received September 6, 2007. However the remaining principal plus additional interest have not yet been appropriated by the Legislature.

IV. CUMULATIVE CHANGES IN CCPI AND THE IMPACT ON ALLOWANCE PURCHASING POWER

Exhibit A displays the CCPI figures for June of every calendar year since 1956 and the percent of increase in the CCPI that has occurred from June of each year through December 2007.

Exhibit B displays the average impact of inflation, through December 2007, based on when allowances were initially paid by year. The exhibit includes, by calendar year, the change in CCPI, the average increase in allowances, the average purchasing power of allowances, and the average increase needed to restore full purchasing power.

A review of the average purchasing power of allowances as of December 2007 (Column 4 in Exhibit B) allows determination of the point at which supplemental payments will begin. This review indicates that supplemental benefit payments will be made to benefit recipients whose initial benefit was paid in 1989 or earlier.

V. EROSION OF ALLOWANCE PURCHASING POWER

The current CalSTRS DB Program was implemented in July 1972. As part of the basic benefits under this program, DB Program allowances are increased by an annual benefit improvement factor equal to 2 percent of the initial allowance payable. Based on the low rates of inflation during the preceding fifteen years, a 2 percent simple increase was expected to prevent significant erosion of the purchasing power of DB Program allowances. However, the rate of inflation increased significantly in the mid-1970's and through most of the 1980's. The CCPI rose 442.2 percent in the period from June 1972 to December 2007, for an annual average rate of 4.95 percent.

Legislation requiring this report was enacted in 1979. The CCPI has risen 209.3 percent in the period from June 1979 to December 2007. During this period, 28 annual 2 percent simple benefit improvements have been applied to allowances, for a total increase of 56 percent.

On January 1, 1980, DB Program benefit recipients received a substantial ad hoc increase intended to adjust allowances up to 72 percent of the purchasing power of the initial allowance based on an estimated September 1979 CCPI. The increase effectively raised the purchasing power of DB Program allowances to an average of 71 percent of the initial allowances based on the June 1979 CCPI.

Exhibit C displays the number of benefit recipients by percentage of allowance purchasing power level. As indicated in Exhibit D, the allowances paid to 58,705 (26.8 percent) benefit recipients are expected to be below 80 percent of the purchasing power of their initial allowances in June 2008, while 160,007 (73.2 percent) are expected to be at or above the targeted 80 percent purchasing power maintenance level.

The graph below indicates the purchasing power of current DB Program allowances. The

Initial Allowance area of this graph shows the current average purchasing power of the initial DB Program allowances using the change in the California Consumer Price Index from June of the calendar year in which the benefits became effective to December of 2007. The Permanent Increases area shows how the permanent allowance increases (the annual 2 percent benefit improvement plus any applicable ad hoc increases) have added to the purchasing power of the initial allowances. During 2007-08, the purchasing power of the allowances has been raised to the level indicated by the Supplemental Increase area of the chart by means of quarterly supplemental benefit payments. These quarterly payments are payable on an annual basis subject to the availability of revenues from the SBMA Reserve, School Lands and General Fund contributions to the SBMA.

VI. COST OF RESTORING ALLOWANCE PURCHASING POWER

The estimated cost of the supplemental benefit payments needed to restore the allowances payable in 2008-09 to 80 percent of the original purchasing power is shown in Exhibit D. The State Lands Commission estimates that there will be \$4.9 million in revenues for supplemental benefit payments to DB Program benefit recipients in 2008-09. These payments will be prorated among those benefit recipients whose allowances, after application of the annual 2 percent benefit improvement, have fallen below 80 percent of the purchasing power of their initial allowances.

An additional \$261,738,543 will be required to bring the purchasing power level of all allowances to a minimum of 80 percent of the initial allowance. This amount will be provided from the SBMA.

A history of supplemental benefit payments and the source of income for those payments are

displayed in Exhibit E. This exhibit shows that, prior to 1992-93, the Teachers' Retirement Fund provided the balance of the amount needed in the SBMA to restore purchasing power to a minimum of 68.2 percent of the purchasing power of the initial allowance. General Fund contributions made in subsequent years that were in excess of that needed to restore purchasing power to a minimum of 68.2 percent were used to repay the Teachers' Retirement Fund. With completion of the full repayment of amounts from the Teachers' Retirement Fund, General Fund contributions are now accumulated in the SBMA to assist with funding subsequent supplemental benefit payments.

**CALIFORNIA STATE TEACHERS' RETIREMENT SYSTEM
INCREASE IN CALIFORNIA CONSUMER PRICE INDEX FROM YEAR OF
BENEFIT EFFECTIVE DATE THROUGH DECEMBER 2007**

<u>Calendar Year of Benefit Effective Date</u>	<u>CA Consumer Price Index as of June</u>	<u>Percent Increase Through December 2007</u>
1956	26.2	738.1
1957	27.1	710.3
1958	28.1	681.5
1959	28.5	670.5
1960	29.1	654.6
1961	29.5	644.4
1962	30.0	632.0
1963	30.2	627.1
1964	30.8	613.0
1965	31.6	594.9
1966	32.1	584.1
1967	32.9	567.5
1968	34.3	540.2
1969	36.0	510.0
1970	37.9	479.4
1971	39.4	457.3
1972	40.5	442.2
1973	42.7	414.3
1974	47.1	366.2
1975	52.0	322.3
1976	55.2	297.8
1977	59.5	269.1
1978	64.6	239.9
1979	71.0	209.3
1980	83.3	163.6
1981	90.1	143.7
1982	98.5	122.9
1983	99.1	121.6
1984	103.6	112.0
1985	108.4	102.6
1986	112.2	95.7
1987	116.3	88.8
1988	121.7	80.4
1989	128.2	71.3
1990	134.3	63.5
1991	140.1	56.7
1992	145.2	51.2
1993	148.9	47.5
1994	150.7	45.7
1995	154.2	42.4
1996	156.6	40.2
1997	160.0	37.2
1998	163.6	34.2
1999	167.8	30.9

<u>Calendar Year of Benefit Effective Date</u>	<u>CA Consumer Price Index as of June</u>	<u>Percent Increase Through December 2007</u>
2000	174.0	26.2
2001	183.2	19.9
2002	185.9	18.1
2003	189.9	15.6
2004	195.8	12.2
2005	201.3	9.1
2006	210.9	4.1
2007	217.4	1.0

The increase from calendar year of the benefit effective date is calculated by dividing the December 2007 CCPI (219.593) by the index figure for the year of retirement and adjusting the results to reflect the percentage increase. For example, the calculation for 1956 is: $219.593 / 26.2 = 8.381 - 1.000 = 7.381 \times 100 = 738.1$.

**CALIFORNIA STATE TEACHERS' RETIREMENT SYSTEM

Explanation of source and/or calculation of data in columns 3, 4 and 5:

- Column 3 - Increases from all sources as a percentage of initial allowance. Obtained by dividing total current allowance by total initial allowance and adjusting to a percentage.
- Column 4 - Purchasing Power as of December 2007. Obtained by dividing total current allowance payable by full CCPI adjusted allowance. Based on totals for all benefit types by calendar year of effective date.
- Column 5 - Percentage increase in current allowance payable required to restore full 100 percent purchasing power as of December 2007. Obtained by dividing the fully adjusted CCPI allowance factor (column 2) by the percentage increase to date (column 3) and adjusting to a percentage. Example: $(754.4 + 100) / (270.8 + 100) = 2.3042 \times 100 = 230.42 - 100 = 130.42$ percent.

0.0% - 40.0%	<u>5,517</u>	<u>2.52%</u>
	218,712	100.00%

In this exhibit benefit recipients are grouped by the percentage of allowance purchasing power level of their current allowances. Those with initial allowances plus permanent increases from all sources equal to and below 40 percent of full purchasing power are combined in one group. The purchasing power level of 524 benefit recipients is at exactly 100.0%

^e Total contributions received from the General Fund were \$332,513,817 of which \$61,290,717 was used to pay the loan balance from the Teachers' Retirement Fund, and \$157,915,697 was used for purchasing power payments. The remaining balance of \$113,307,403 established the SBMA reserve account at June 30, 1997.

^f General Fund contributions of \$403,479,543 minus a one time reduction of \$320,000,000 per Chapter 939, Statutes of 1997 which occurred as a direct result of the sale of the Elk Hills Naval Petroleum Reserve by the Federal Government.

^g General Fund contributions of \$558,867,986 minus a one time reduction of \$500,000,000 per Chapter 6, Statutes of 2003 (SBX1-20).

^h All 2007-08 figures are estimated.
