### BIOGRAPHY

Han Yang, PhD is an Executive Director at J.P. Morgan Chase, building artificial intelligence services and machine learning platforms in the cloud. Han previously served as Senior Product Manager at Cisco Systems, where he drove solutions for artificial intelligence, machine learning, and big data on Cisco servers. In addition, Han led the industry's first software defined networking switch. Han has a PhD in Electrical Engineering from Stanford University and enjoys driving disruptive technologies into business value. Han will lead an interactive discussion on artificial intelligence, including the risks and opportunities, and impacts to CalSTRS.
