## Introduction

This appendix analyzes the economic impact of ongoing monthly and quarterly benefit payments made by the California State Teachers' Retirement System (CalSTRS) in fiscal year 2011-2012 (FY 2012) on California and its Congressional districts. CalSTRS benefit payments totaled \$10.7 billion in FY 2012, of which approximately \$9.2 billion were ongoing monthly and quarterly benefit payments to beneficiaries living in California. Table C1 reports CalSTRS benefit program payments by Congressional district. A significant portion of these payments are spent on in-state goods and services, which supports local businesses. These businesses purchase goods themselves, which increases demand for other local vendors and further enlarges the California workforce and economy.

Before estimating the economic impact of expenditures from these payments, they were adjusted across each Congressional district to account for income taxes and savings. This process and details of the economic impact analysis are reported in Section 4 of the Overview Report, but we have included a diagrammatic representation in Figure C1. Once the \$7.6 billion in total expenditures by beneficiaries and government expenditures supported from CalSTRS beneficiary income tax payments were derived,

<sup>1</sup> The names for the Congressional districts are taken from the website: *Around The Capitol*. For details see: <http://www.aroundthecapitol.com/districts/>

they were distributed according to industry to get the direct output effect for California and the associated total economic impact. A similar process was followed for each Congressional district. Total expenditures for each Congressional district were calculated, and then the total output effect was obtained from the sum of direct, indirect, and induced effects that were estimated through input-output models calibrated to reflect each Congressional district. Using these models, employment and labor income effects for each Congressional district were also derived.

**Figure C1 Overview of the Impact Analysis Process**

The \$7.3 billion in net beneficiary expenditures, the \$392 million government expenditures supported from CalSTRS beneficiary income tax payments, and the resulting \$7.6 billion in total expenditures are reported by Congressional district in Table C2. The Congressional districts' rankings with respect to their benefit payments, total output impacts, and total output impacts relative to their economies are reported in Table C3. A summary of net expenditures and the various total effects across Congressional districts are then reported in Table C4. A state-wide map of Congressional districts is presented as a reference in Figure C2, following which are detailed summaries for each Congressional district.
